

2016-17 School Choice Data

The following charts present 2016-17 school choice data for kindergarten, sixth, and ninth grade general education students. Additional historical choice data is available online in Section 2 of the [Annual Enrollment Report](#).

Each school's charts contain the number of on-time choice applications (received during the Open Enrollment period) and the number of assigned and waitlisted students during initial processing. Late choice applications may still be submitted after Open Enrollment, but they do not receive tiebreakers and are not included in these charts.

These charts also include the number of applications with tiebreakers. Tiebreakers are used to determine assignment and waitlist status if there are more applications than seats available for a particular school and grade. Additional information about tiebreakers is provided in the [Student Assignment Plan](#).

Note: Kindergarten choice data is organized by middle school service area. For example, Dunlap Elementary School is located within the Aki Kurose Middle School service area. All of the other elementary schools within the Aki Kurose service area are listed next, before elementary schools in the Denny Middle School service area.
